Sales Partner Opportunity — Managed A/R for trucking companies

What Credyx is

Credyx is accounts-receivable and back-office service for trucking carriers. We verify the carrier's paperwork, submit invoices to brokers, follow up on payments, handle holds and disputes, and keep the carrier updated live in one portal — through **paid on time**. Credyx is **not factoring and not a cash advance**: carriers keep their broker relationships and their money, and we simply get them paid.

What the carrier gets

- **Paperwork verified** so nothing gets missed or rejected by brokers
- **Invoices submitted to brokers** by a Credyx A/R representative
- **Broker follow-up**, holds and dispute support handled for them
- **Live A/R status** in a client portal — invoices, payments, reports, collections
- **Secure document storage** (10 GB) for rate confirmations, BOLs and NOAs

Why carriers say yes

Small and mid-size fleets lose hours every week chasing paperwork and brokers, and slow-paying brokers strain cash flow. With Credyx there is no platform fee — the carrier pays only a small percentage of what is actually collected, so the service pays for itself and costs nothing when nothing is collected.

What you sell: the Managed tier only

Credyx offers a self-service plan, but **your focus is the Managed tier**: a full-service offering where the Credyx team does the work for the carrier. Position it as "your back office, handled — and you only pay on volume we collect." Please do not sell or quote Self-Service.

Your commission

You earn **50% of the Credyx fee** on every client you bring in. The fee the carrier pays is a percentage of collected volume, set by **1%–2% depending on fleet size** (number of trucks) — larger fleets are priced toward the lower end, smaller fleets toward the higher end.

Illustrative example	
Carrier collections through Credyx	**$100,000 / month**
Credyx fee at 2%	**$2,000 / month**
Your 50% commission	**$1,000 / month**
Same carrier at 1% fee → your commission	**$500 / month**

Figures are examples only; actual commission depends on each client's collected volume and agreed fee.

Who to target

- Owner-operators and small/mid fleets that invoice brokers regularly
- Carriers who struggle with paperwork, rejected invoices or slow broker payments
- Dispatch and back-office teams who want to stop chasing payments
- Anyone who wants A/R help **without** factoring fees or giving up control

How it works

1. **You introduce** a carrier and tell us who they are.
2. **Credyx enrolls and onboards** them onto the Managed tier — we handle everything from there.
3. **You earn 50%** of the Credyx fee on the volume that carrier brings through.

A 30-second pitch you can use

> *"We take over your back office. Credyx verifies your paperwork, invoices your brokers, chases the payments and handles holds and disputes — and you see everything live in one portal. It's not factoring and there's no platform fee: you only pay a small percentage of what we actually collect for you."*

Quick answers to common questions

- **Is this factoring?** No. Carriers are not selling invoices or taking advances — Credyx handles A/R and back-office work.
- **Is there a monthly fee?** No platform fee. Carriers pay only a percentage (1%–2%, based on fleet size) of collected volume.
- **Who does the work?** On the Managed tier, a Credyx A/R representative works the carrier's paperwork and invoices.

Empowering truckers. Simplifying payments. Driving success.
