Exhibit A - Fee Schedule

Attached to the Carrier Master Service Agreement

Credyx: as defined in the Carrier Master Service Agreement (Credyx A/R Solutions)

Client: as identified in the MSA signature block

Effective with MSA dated: July 29, 2026

This Exhibit A describes how Client pays Credyx. It does not describe broker freight payments. Brokers pay Client; Credyx bills Client for Credyx fees only.

1. Fee components

Client's monthly Credyx bill includes only the fees agreed under this Exhibit (and any signed fee terms for the Client). No platform fee or collection fee applies unless agreed as described below.

1. Platform (app) fee: US $99 per month if agreed by the parties (for example by signing this Exhibit with the platform fee selected, confirming it at enrollment, or completing §10 / another writing). If no platform fee is agreed, none is charged.

2. Collection / A/R service fee: the agreed percentage or flat rate under §3 or §10, applied to eligible collected amounts in the billing period (see §2). If no collection fee is agreed, none is charged.

Monthly Credyx bill ? (agreed platform fee, if any) + (agreed rate × eligible collections, if any)

+ any other adjustments the parties have agreed (e.g., force-close fee lines)

Credyx does not deduct its fee from broker remittances. Client pays Credyx separately (e.g., via Payoneer payment request or other method Credyx designates).

2. What the % applies to (eligible collections)

Unless otherwise agreed in writing:

- The percentage fee applies to confirmed collections attributable to Client invoices handled through Credyx in the billing month (payments Credyx records as confirmed).
- Pending, reversed, or uncollected amounts are not billed as collections.
- Write-offs / uncollected balances do not generate a collections percentage fee (Credyx is not paid a % on money never collected), subject to any force-close rule below.
- Only invoices/activity eligible under Client's plan and Credyx's billing rules are included. Credyx does not charge collection fees on amounts outside the Services.

If Client and Credyx agree a specific rate in §10 (or store agreed fee_terms on the Client account), that agreed rate controls for the covered activity.

3. Agreed collection fee schedule

By signing the MSA and this Exhibit (or by confirming fee terms at enrollment), Client and Credyx agree to the collection fees below when a collection fee is part of the agreed arrangement, unless a different rate is completed and initialed in §10.

If the parties agree there is no collection fee, §3 does not apply.

Rates (when agreed) are based on Client's collected volume in the billing month (flat tier on the whole base for that month):

Monthly collected volume (Client) | Agreed rate | Agreed factoring-related rate*

Under US $100,000 | **1.25%** | **0.70%**

US $100,000 - $250,000 | **1.00%** | **0.60%**

US $250,000 - $500,000 | **0.90%** | **0.50%**

Over US $500,000 | As separately agreed in writing | As separately agreed in writing

*Factoring-related rates apply only when Credyx has marked the account as factoring-related (typically evidenced by a third-party NOA in the vault). Factoring is Client's relationship with a third party - not Credyx buying invoices.

Self-Service and Managed use the same agreed schedule above unless the parties agree a different Managed premium or override in §10 or another writing.

These are agreed contractual fees for this Client, not a public "list price" Credyx must offer every carrier.

4. Trial

If Credyx grants a trial (trial subscription status):

- Default draft posture: platform fee and collection fee waived during the stated trial window, unless Credyx's trial notice says otherwise.
- After trial, the agreed fees under this Exhibit apply automatically unless the account is cancelled or the parties agree otherwise in writing.

5. Managed force-close (if used)

Force-close eligibility and process are defined in the MSA (Managed plan; typically 90+ days outstanding after collection efforts). If Credyx force-closes an eligible invoice/load, Credyx may add a one-time fee line of:

agreed applicable rate × invoice amount

for that item in the month's bill (so work performed is not zero-fee solely because the broker never paid), unless the parties agree otherwise in writing. Force-close does not make Credyx liable for unpaid freight.

6. Credyx fee bills - invoicing and payment

This section covers Client's payment of Credyx fees only. It does not set broker freight payment terms (see the MSA regarding per-broker due dates).

- Credyx issues periodic Credyx fee bills (typically monthly) summarizing agreed platform fees, collection fees, and adjustments.
- Payment of each Credyx fee bill is due on the due date stated on that bill (or in the related Payoneer payment request).
- Launch payment method: Payoneer payment requests (or successor method Credyx specifies).
- Client must keep billing contacts and Payoneer/payment details current.

7. Late payment, warning, and lock (Credyx fee bills)

Applies to unpaid Credyx fee bills, measured from the bill's stated due date (or bill date if no separate due date is shown):

Timing | Consequence (draft product rule)

Credyx fee bill issued | Payment request sent

~30 days past due | Reminder

~60 days past due | Stronger portal warning of upcoming lock

~90 days past due | **Account locked / suspended** - portal limited to billing resolution until settled

Locking does not forgive amounts owed. Credyx may reactivate after confirmed payment or admin grace, at Credyx's discretion.

These timelines are about paying Credyx - not about when brokers must pay Client's freight invoices.

8. Fee snapshots

Where Credyx locks fee terms to a batch or invoice, billing for that activity uses the locked snapshot, not a later rate change. Future rate changes apply going forward only as described in the MSA and only for periods after notice, unless the parties agree otherwise.

9. Taxes

Fees are exclusive of applicable taxes. Client is responsible for taxes imposed on Client's business; Credyx may charge tax if legally required to collect it.

10. Different agreed fees (optional)

Complete and initial to confirm or change fees:

Field | Value

Platform fee | [ ] Agreed at US $99/mo [ ] Agreed at US $ _____ /mo [ ] No platform fee

Collection fee type | [ ] Percentage [ ] Flat [ ] None

Percentage | _____ %

Flat amount | US $ _____

Notes | _____

Client initial | _____

Credyx initial | _____

If §10 is completed, it is the agreed fee arrangement and controls over §1 and §3 to the extent it differs. Platform fees apply only if agreed (checked above or otherwise agreed in writing / at enrollment).
